

The Pacific’s transition is not one story.

A common-year comparison of renewable energy share and greenhouse gas emissions per person across seven Pacific island states.

STATIC FALLBACK · 2022

Three signals, different pressures

Right = higher renewable share. Up = higher GHG emissions per person. The axes are descriptive signals, not a score.

WHAT THE SNAPSHOT SAYS

Solomon Islands has the highest renewable share.

50.08% in 2022. Tuvalu records the lowest emissions in the comparison at 0.4 tonnes per person.

2022 comparison

COUNTRY	RENEWABLE	GHG / PERSON	SST ANOMALY
1 Solomon Islands	50.08%	0.8 t	0.7°C
2 Kiribati	41.86%	0.8 t	-0.6°C
3 Samoa	31.75%	2.4 t	0.3°C
4 Vanuatu	27.56%	2.1 t	1.1°C
5 Fiji	26.67%	2.7 t	1.1°C
6 Tuvalu	5.52%	0.4 t	-0.1°C
7 Tonga	2.08%	2.7 t	1.1°C
